

Tobacco and Alternative Smoking Products

Students should be aware of the many physical dangers associated with the use of tobacco and nicotine products. To maintain a healthy environment and to encourage healthy lifestyles for all students, staff, and faculty, use of all tobacco products (including smokeless tobacco and any vapor products) is strictly prohibited on the LCU campus. The safety of all residents requires students and their guests respect this policy. Students should be aware they will be held responsible for the actions of any of their visitors or guests.
